Innovation

We combine modern technologies with sophisticated design to offer products that not only warm your interior but also spark your imagination.

Quality

Our products are designed and manufactured with durability in mind – to provide our customers not only with comfort but also with reliability that lasts for years.

Ecological solutions

We develop heating solutions that are not only efficient but also environmentally friendly.

Design

Precise craftsmanship, premium materials, and timeless design – all of this makes our fireplace the heart of your home.

We are Bålstil

Our mission

We focus on the smallest elements **that are essential to the aesthetics of the final product**, and we strive for **user safety and process efficiency**. In the design process, we focus on fulfilling the expectations of our customers.

We analyze their needs, look for optimal solutions for our designs and innovative technologies so that our products not only follow: current trends but also stand out in the market. We use only advanced manufacturing technologies.

We value innovation and precision. **Our products are solid, made from the highest quality materials available on the market**, and are designed for long-term, intensive use.

Modena

Bålstil Stove

Modena is a modern freestanding fireplace powered by bioethanol. Its elegant shape and panoramic glass beautifully showcase the flame, creating a cozy atmosphere in any interior.

It does not require a chimney connection, offering complete freedom in arrangement. Perfect for apartments, homes, and commercial spaces. Easy to use, stylish, and functional – ready to impress every day.

Finish options:

Sintered Quartz

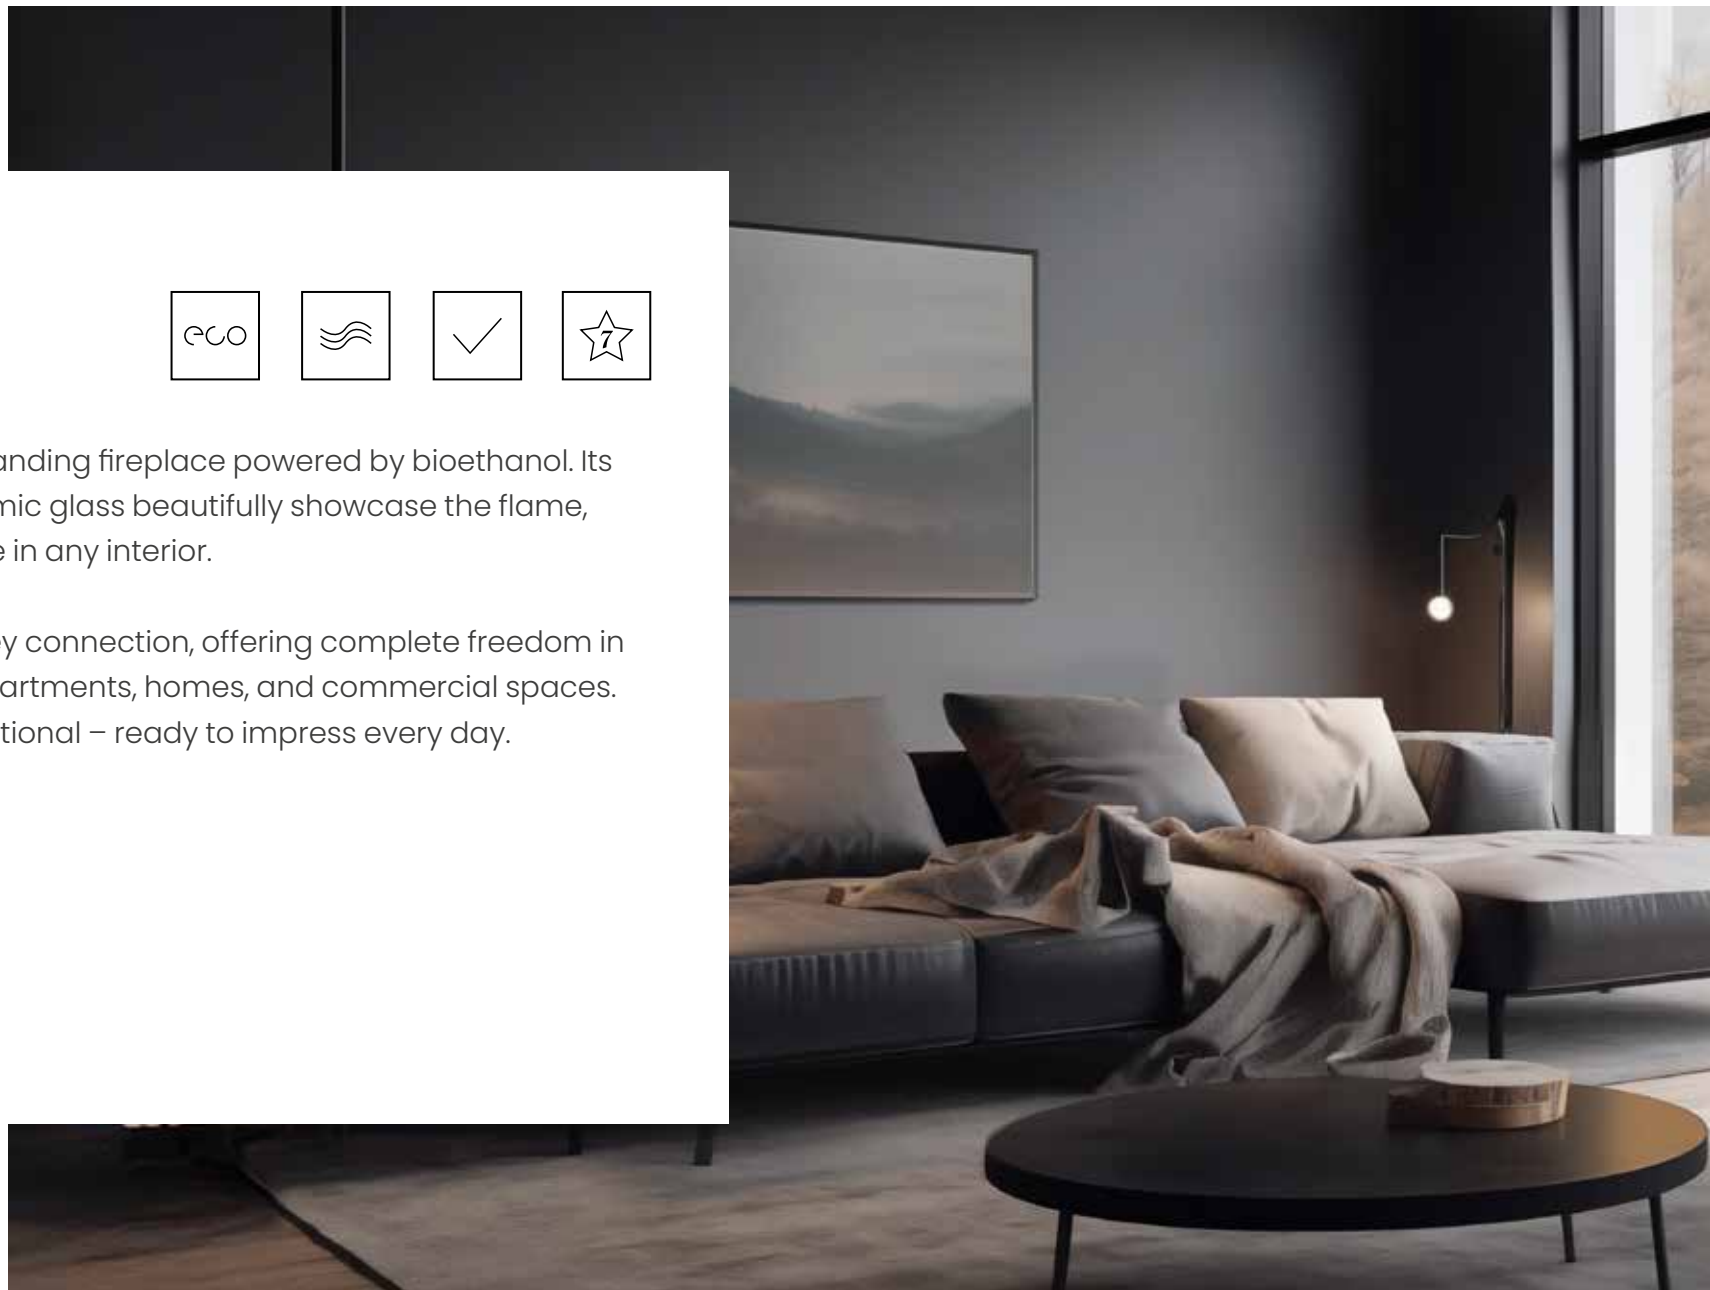

Seta
Liquorice

Fokos
Grafite

Right corner **┐**

A modern living room interior featuring a large, dark leather sectional sofa with a light-colored blanket draped over it. In the foreground, a low, round, dark coffee table holds a small wooden box. To the right, a tall, black, rectangular wood-burning stove with a glass front is lit, showing a fire. A stack of firewood is visible next to it. The room has large floor-to-ceiling windows that offer a view of a misty, forested landscape. A framed abstract painting hangs on the left wall, and a modern floor lamp is on the right.

FF700, FF1000 and external pump

Bålstil Automatic Biofireplace

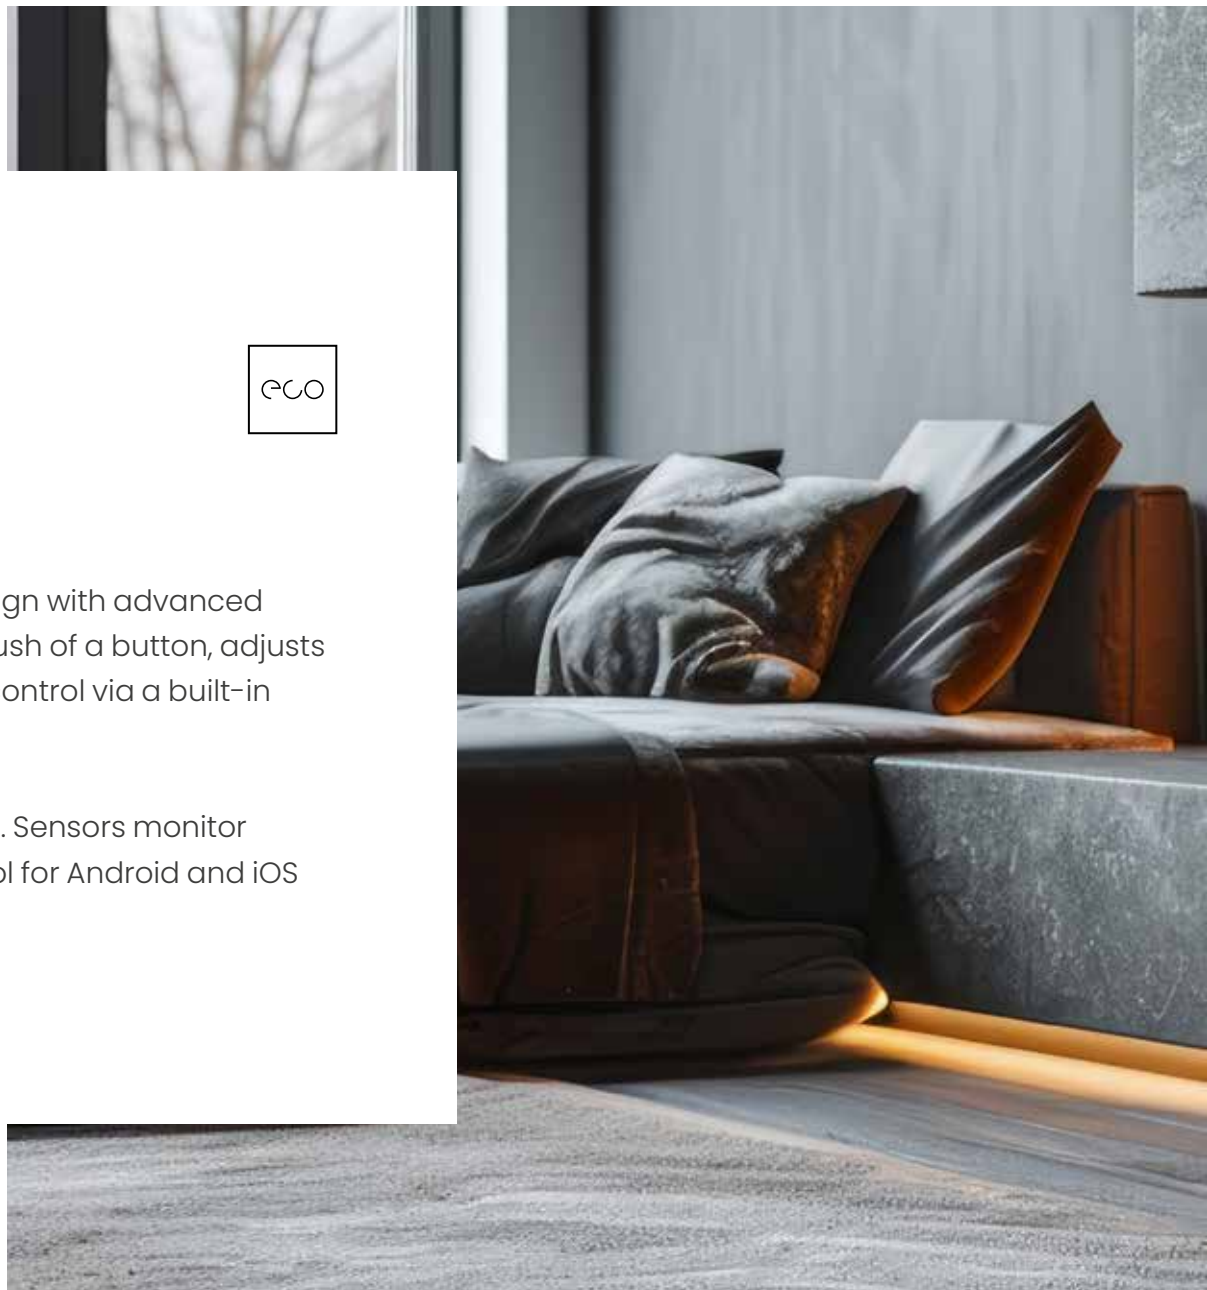

The automatic bioethanol fireplace FF combines modern design with advanced technology to provide warmth and ambiance. It starts at the push of a button, adjusts flame intensity to the desired temperature, and offers precise control via a built-in thermostat.

It uses eco-friendly biofuel, safely refillable with a special pump. Sensors monitor temperature and fuel level, ensuring safe operation. App control for Android and iOS allows easy remote use. Perfect for cozy living spaces.
