
MANUAL AND INSTRUCTION

WESTBO Classic electric

Safety instructions

Do not install the electric fireplace directly on a carpet or other similar surface that may prevent the air circulation under the product.

After the electric fireplace is turned on and heated, the hot air outlet is at a high temperature. Do not place bedding, clothing, curtains, paper, etc. within 30 cm from the front of the electric fireplace and within 10 cm from the sides and back. When turning off the electric fireplace and disconnecting the power, first turn off the electric fireplace with the remote control, and then unplug the power cord.

Do not place the electric fireplace in a humid environment, such as a laundry room, bathroom, etc. When installing an electric fireplace, do not lay cables under carpets or flammables. When using an electric fireplace near a patient or child, pay attention to safety and take extra care.

You must use a well grounded and fused socket. When the electric fireplace is in a heated state and objects are covered or covered at the air inlet, the heating components may be overheated. At this time, the product overheat protection function will automatically cut off the input power. After 8 minutes cooling down it is possible to restart the unit.

Product features

The Westbo Classic Electric is a traditional Swedish cast iron stove. In the past it was placed in small rooms or workplaces with little space and with the need for warmth. The handy stove is easy to place where the space is limited.

The simulated wood burning is made of environmentally friendly materials.

The surface treatment of sheet metal parts is made of high temperature resistant environmentally friendly plastic powder, and materials used are non-toxic and harmless, and meets the environmental standards.

The flame is realistic, using coated glass tredimensional imaging, with a real sense of presence.

The infrared remote control is used to control each function, and at the same time, the auxiliary sound and light prompt function informs the user of the current working state.

The body of the stove is made from cast iron.

Unpack the product, take out the top cover, electric ceramic stove, bottom feet and accessories.

Fasten the bottom feet to the bottom of the furnace body with the combination screws allotted. See the figure below.

How to install

Place the electric fireplace in a safe and suitable location, please see safety instruction page 2. Plug the power cord into the socket at the bottom of the product to ensure that the power cord is not blocked or crushed.

Plug the power cord into a wall outlet rated min.10A.

When you hear a beep, it indicates that the power is on.

The power input method is shown in the following figure.
